

Flow Chart for Required Forms for High School Projects

Students participating in NJAS Regional Science Fairs need to adhere to ALL forms requirements.

Throughout this section on required forms a convention is followed which indicates that specific forms are either **Required** or **May Be Required**. To graphically differentiate between these conditions the symbols shown below are used. Note that the forms shown in a rectangular box are **Required** while the forms shown in a rounded corner rectangular box **May Be Required**. Carefully read the details of each section to determine the exact form requirements. Always refer to the complete Rules for full details on requirements.

Requirements for ALL Projects

All projects, regardless of the area of experimentation, need to adhere to the requirements of this section on flow charts. Additional forms, based on the specific area of experimentation, may be required.
